

Q: PAR - Pay-as you Record. What is the idea?

A: Pay-as-you-Record is a unique way to ease your budget burdens when investing in high speed cameras. For many applications you do not always need the ultimate high resolution and framing speed but... sometimes it is required or nice to have. Why then spending the money on more expensive equipment? Just pay when you need it!

Q: Do I have to buy the licenses when buying the camera?

A: No, you can buy the license any time later. Contact your distributor for prices.

Q: Can I permanently unlock the camera for higher resolution and speed?

A: Yes, this is possible. Contact your distributor for details.

Q: I do have multiple licenses. Do I have to use these licenses in consecutive days?

A: Buying multiple licenses gives you a price advantage. You do not need to use the license in consecutive days. Each key is valid for 24hrs after activation.

Q: Do I have to add/download specific/additional software for activating PAR?

A: No, all license activation is handled by Imaging Studio V4 that comes with the camera

Q: Do I need Internet access to activate the license?

A: No Internet connection is required to activate the license on the camera.

Q: I have misplaced the licenses, some are unused. Can you send me the remaining ones?

A: Unfortunately, AOS Technologies cannot re-generate any license
